BRIDGE® | A CASE STUDY

Tax advantages of a 1035 exchange, retirement savings and long-term care benefits when needed

Meet Carol

Age: 70

Retirement assets:

\$250,000 Non-qualified annuity

- \$100,000 cost basis
- \$150,000 gain (taxable)

Concerns:

- Position assets more tax-efficiently with a 1035 exchange
- Obtain guaranteed¹ long-term care benefits after being declined for traditional long-term care insurance
- Avoid burdening her children for assistance as she ages

Let's look at the numbers

What if Carol had accessed the funds from the previous annuity for long-term care expenses without completing a 1035 exchange?

Now, let's see how using a 1035 exchange to convert a Non-qualified annuity to Bridge would help.

Without a 1035 exchange — Accessing funds

Total withdrawal	\$250,000
Taxable portion	\$150,000
Tax rate	22%
Tax owed	\$33,000
Net proceeds after tax	\$217,000

With 1035 exchange — Bridge at issue

Initial premium	\$250,000
Underwriting class	Secure
Coverage Ratio	135%
Initial Benefit Base	\$337,500

Five years later — claim submitted

After five years of active participation in the NeverStop® Health Coaching & Rewards Program, which helped Carol support a healthy and independent lifestyle, she developed a health condition requiring long-term care services. At age 75, she was no longer able to perform two of six activities of daily living, which meant she qualified for long-term care benefits. She filed a claim and submitted a plan of care from her doctor.

Because she had used a 1035 exchange to convert her Non-qualified annuity to Bridge, her assets grew on a tax-deferred basis, and she had access to tax-free² long-term care benefits and easy claims — no receipts or invoices required.

Bridge at claim	
Benefit Base	\$391,255
NeverStop Wellness Credits	\$1,739
Total Benefit Base at claim	\$392,994
LTC monthly benefit	\$6,550
