

BRIDGE

Affordable long-term care benefits, guaranteed underwriting approval and more accumulation potential

GERALD

Age: 64

Retirement assets:

- \$400,000 in IRA mutual funds
- \$250,000 in non-qualified CDs
- \$150,000 in money market account

Concerns:

- Potential impact an illness or injury could have on assets
- Earning higher returns on Non-qualified investments without too much market risk
- Eligibility for traditional long-term care insurance and passing underwriting
- Elements of traditional long-term care policies — expensive and ongoing premium payments, limitations on use of benefits, paying for coverage he might never use

10 years later – claim submitted

After 10 years, Gerald develops a condition requiring long-term care services.

At age 74, he is no longer able to perform two of six activities of daily living. He files a claim and a plan of care provided by his doctor.
